EXAMINER

KNOWLIN, THJUAN P

ART UNIT PAPER NUMBER

2614

SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	03/12/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary

Application No.

09/876,411

Applicant(s)

TOYODA ET AL.

Examiner

Thjuan P. Knowlin

Art Unit

2614

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 November 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 07 June 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on July 02, 2006 has been entered. Claims 1 and 3 have been amended. No claims have been cancelled. No claims have been added. Claims 1-18 are still pending in this application, with claims 1 and 3 being independent.
2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. For example, the limitation, "wherein the electro-magnetic wave absorber does not provide a signal that is processed by the communication apparatus", recited in claim 1, and the limitation, "wherein the electro-magnetic wave absorber does not provide a signal that is processed by the portable telephone", recited in claim 3, are not described in the specification in such a way as to

reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, has possession of the claimed invention.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thiel et al (US 6,288,682), in view of Paulick (US 5,710,987).
5. In regards to claims 1, 2, 17, and 18, Thiel discloses a communication apparatus (See Fig. 1a and mobile telephone 10) comprising: an antenna (See Fig. 1b-1c and antenna 14) for transmitting and/or receiving a wireless signal, a signal processing circuit (See Fig. 3 and transceiver 78) for processing a signal corresponding to a wireless signal received by the antenna, a conductive case (See Fig. 3 and dielectric cylinder 60) for surrounding and housing all or part of the signal processing circuit, and an electro-magnetic wave absorber (See Fig. 1a-1c and structure 12) with one surface adjacent a predetermined area of the conductive case for absorbing electro-magnetic waves in order to reduce electro-magnetic waves reaching a user of the communication apparatus, and wherein the electromagnetic wave absorber does not provide a signal that is processed by the communication apparatus (See col. 4 lines 37-67), and a conductive member (See Fig. 1c and conductive sheet 22) provided at another surface

Art Unit: 2614

of the electro-magnetic wave absorber and being electrically connected to the conductive case (See col. 4 lines 37-49). Although Thiel discloses a signal processing circuit for processing a signal corresponding to a wireless signal received by the antenna. Paulick, more specifically, discloses a signal processing circuit (See Fig. 2 and radiotelephone transceiver circuitry 224) for processing a signal corresponding to a wireless signal received by the antenna (See col. 3 lines 4-19). Therefore, it would have been obvious for one of ordinary skill in the art at the time of the invention to employ these limitations within the apparatus as a way for the portable electronic apparatus or communication apparatus to receive and transmit signals.

6. In regards to claims 3, 7, 8, 9, 12, 13, 15, and 16, Thiel discloses all of claims 3, 7, 8, 9, 12, 13, 15, and 16 limitations, except a portable telephone comprising: a circuit for generating a wireless signal corresponding to said sound signal generated by said microphone. Paulick, however, discloses a circuit for generating a wireless signal corresponding to said sound signal generated by said microphone (See Fig. 1 and microphone 116) (See col. 3 lines 4-19).

7. In regards to claims 4 and 14, Thiel discloses all of claims 4 and 14 limitations, except a portable telephone, wherein said circuit comprises: a transmitting circuit for generating a wireless signal corresponding to a sound signal from the microphone, a receiving circuit for generating a sound signal in response to a wireless signal received by the antenna and outputting the sound signal, and a printed circuit board containing the transmitting circuit and the receiving circuit. Paulick, however, discloses a portable telephone, wherein said circuit comprises: a transmitting circuit (See Fig. 2 and

Art Unit: 2614

transceiver circuitry 224) for generating a wireless signal corresponding to a sound signal from the microphone (See col. 3 lines 4-19), a receiving circuit (See Fig. 2 and pager receiver circuitry 218) for generating a sound signal in response to a wireless signal received by the antenna and outputting the sound signal (See col. 3 lines 4-19), and a printed circuit board (See Fig. 2 and printed circuit board 226) containing the transmitting circuit and the receiving circuit (See Fig. 2).

8. In regards to claims 5, 6, 10, and 11, Thiel discloses a portable telephone, wherein said electro-magnetic wave absorber (See Fig. 1a-1c and structure 12) is arranged at a surface of said shield case close to a head of a user of the portable telephone at the time of a call (See col. 2-3 lines 56-7 and col. 4 lines 57-61).

Response to Arguments

9. Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thjuan P. Knowlin whose telephone number is (571) 272-7486. The examiner can normally be reached on Mon-Fri 8:30-5:00pm.

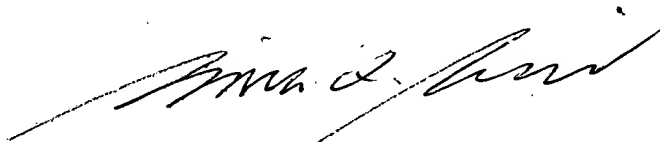

11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar can be reached on (571) 272-7488. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2614

12. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
